Electronic Appliances assignment

Through a brief research, you will have to answer questions in order to demonstrate that electric appliances have a significant impact on our lives. Furthermore, you will have to show that electric appliances are constantly upgrading and you will be asked to predict how they will be in 20 and 50 years. For this assignment, you may use Internet as well as the numerous tools (internet sites, videos, and worksheets) provided by your teacher. Time will be given in class. However it is your responsibility to work at home in order to be able to respect the dead line. As you can see, this document was sent to you by email and it is your responsibility to print it at home and to hand it in on time. The latecomers will be penalized. However, the due date could change if the teacher judges that more time is required.

-	
2-	According to you, what are the two most important electric appliances invented
	during the 20th century? Moreover, explain how it was when it first appeared on the
	market and how it kept progressing throughout the century.
	market and now it kept progressing amoughout the century.
	·

3-	Search on Internet and indicate a few appliances that were invented the same ye
	you were born or that were invented a few years before or after your birth.
4-	Name the appliance that you could not live without and justify why it is so
	important in your daily life?

5-	Choose two electric appliances and describe what you predict they will look like in		
	20 years; in 50 years. If time allows it, your hypothesis will be presented in class.
